EDUCATION

VNU University of Engineering and Technology

M.Sc. in Computer Science

CGPA: 3.85/4.00

Hanoi, Vietnam

09/2024 – 06/2026

VNU University of Engineering and Technology

B.Sc. in Information Technology

CGPA: 3.86/4.00

Hanoi, Vietnam

09/2020 – 06/2024

High School for Gifted Students, VNU University of Science

High School Diploma in Mathematics

CGPA: 9.4/10.0

Hanoi, Vietnam

09/2017 – 06/2020

WORK EXPERIENCE

Institute for Artificial Intelligence, VNU-UET

Teaching Assistant

Hanoi, Vietnam

09/2024 – Present

Courses assisted: Introduction to Programming; Relational Databases and SQL; Computational Thinking; Programming Methodology; Practical Artificial Intelligence Systems Development.

Research interests: Research on medical image analysis leveraging generative methods (e.g., VAE, diffusion, and flow matching), focusing on uncertainty-aware segmentation, weakly supervised anomaly detection, and interpretable prediction of cognitive disorders.

ONGOING RESEARCH

Latent Representation Learning from 3D Brain MRI for Interpretable Prediction in MS

Supervisors: Tran Quoc Long, Nguyen Linh Trung, Guy Nagels

06/2025 – Present

- Develop InfoVAE-Med3D for interpretable latent representation learning from 3D brain MRI.
- Learn structured latent spaces for brain age and cognitive impairment prediction in multiple sclerosis.
- Improve latent representation quality through mutual information maximization for downstream analysis.
- Manuscript submitted to Neuroinformatics in 11/2025 and currently under review.

An Efficient Diffusion-Based Weakly Supervised Anomaly Detection in Medical Images

Supervisor: Tran Quoc Long

10/2025 – Present

- Develop a diffusion-based framework for weakly supervised medical anomaly detection.
- Reconstruct healthy counterparts from abnormal medical images using guided diffusion sampling.
- Design a latent-space diffusion framework with VQ-VAE for faster and more efficient inference..
- Complete the manuscript and prepare for journal submission.

PUBLICATIONS

- Aleatoric uncertainty estimation in medical image segmentation via flow matching. Van Nguyen Phi, **Huynh Trinh Ngoc**, Duy Minh Lam Nguyen, Phu Loc Nguyen, Quoc Long Tran. 2025. In: *International Workshop on Uncertainty for Safe Utilization of Machine Learning in Medical Imaging (UNSURE Workshop at MICCAI)*, pp. 134–144. Springer Nature Switzerland. DOI: [10.1007/978-3-032-06593-3_13](https://doi.org/10.1007/978-3-032-06593-3_13).

- LatentFM: A latent flow matching approach for generative medical image segmentation. **Huynh Trinh Ngoc**, Hoang Anh Nguyen Kim, Toan Nguyen Hai, Long Tran Quoc. 2026. In: *FISU Joint Conference on Artificial Intelligence (FJCAI 2026)*, Can Tho, Vietnam. Preprint: [arXiv:2512.04821](https://arxiv.org/abs/2512.04821).
- Diffusion model in latent space for medical image segmentation. **Huynh Trinh Ngoc**, Toan Nguyen Hai, Ba Luong Son, Long Tran Quoc. 2026. In: *FISU Joint Conference on Artificial Intelligence (FJCAI 2026)*, Can Tho, Vietnam. Preprint: [arXiv:2512.01292](https://arxiv.org/abs/2512.01292).
- The Privacy–Utility Trade-off in Brain MRI Synthesis: A Comparative Framework for Generative Models. Dam Thai Ninh, Nguyen Duc Kien, **Trinh Ngoc Huynh**, Le Quoc Anh, Dinh Tran Hiep, Bui Duc Manh, Nguyen Hai Anh, Miguel D’Haeseleer, Jeroen Van Schependom, Stijn Denissen, Tran Quoc Long, Nguyen Linh Trung, and Guy Nagels. 2025. In: *14th International Symposium on Information and Communication Technology (SOICT)*, Nha Trang, Vietnam, December 2025.

PROJECTS

Ministry of Science and Technology

Research Project Member

Hanoi, Vietnam

08/2022 – 11/2025

Title: Research on the Application of Artificial Intelligence in Lung Cancer Diagnosis through Analysis of Chest CT, Bronchoscopy, and Histopathological Images

Role: Member

Status: Completed

AWARDS AND HONORS

- Viettel Research Excellence Scholarship, 2025
- Full scholarship in 6/8 semesters, 2020-2024.
- 3rd prize in the *Scientific Research Conference for Undergraduates at FIT-UET* with project Diffusion model in latent space for medical image segmentation, 2024.
- Consolation prize in the *Scientific Research Conference for Undergraduates at FIT-UET* with project Developing a GPU-Optimized Real-time AI Surveillance System for Camera, 2024.
- 3rd prize in the *Scientific Research Conference for Undergraduates at FIT-UET* with project Multi-tracking multi-camera project, 2023.
- EVN Scholarship for VNU Students, Academic Year 2022-2023
- Top 5 in the *Air Quality Forecasting Challenge (AI4VN)*, 2022
